

GOALS AND OBJECTIVES

Hospital: Veteran's Hospital (IN/2)

Rotation: Anesthesiology

PGY Level: 1

Medical Knowledge

- Understanding, use and indications of induction agents
- Understanding, use and indications of paralytic agents
- Understanding, use and indications of local anesthetics
- Understanding, use and indications of pulse oximetry
- Understanding, use and indications of arterial line
- Understanding, use and indications of spinal anesthesia
- Understanding, use and indications of airway management

Patient Care

- Perform preoperative anesthetic evaluation
- Perform spinal epidural block
- Perform regional block
- Perform endotracheal intubation
- Perform mask ventilation
- Perform arterial line placement
- Perform CVP

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Baptist Memorial Hospital (IN/3)

Rotation: General Surgery

PGY Level: 1

Medical Knowledge

- Understand fluid and electrolytes
- Write appropriate admission and daily orders
- Recognition of shock, cardiac and pulmonary dysfunction
- Recognition of renal and endocrine compromise
- Appropriate usage of antibiotics
- Ability to dictate discharge and operative reports

Patient Care

- Perform history and physical exam
- Start IV, place NG tube, foley, arterial lines
- Manage simple wounds on ward, recognize infection
- Institute ACLS protocols
- Perform simple biopsy, amputation, hernia repair, appendectomy

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff, and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Baptist Memorial Hospital (IN/3)

Rotation: General Surgery

PGY Level: 2

Medical Knowledge

- All elements expected in PGY-1 goals
- Satisfactory performance level attained on ABSITE
- Baseline understanding of ventilator management
- Understand physiology and pharmacology of shock
- Workup and management of basic patients in principal components

Patient Care

- All elements expected in PGY-1 goals
- Perform CVP, peritoneal lavage, advanced airway management
- Perform flexible colonoscopy & esophagoduodenoscopy
- Perform flexible bronchoscopy, Swan Ganz Catheter
- Perform opening and closing of the abdomen
- Perform abdominal exploration
- Complete Department of Surgery Skills Lab Program

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff, and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.

- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Baptist Memorial Hospital (IN/3)

Rotation: General Surgery

PGY Level: 3

Medical Knowledge

- All elements expected in PGY-2 goals
- Satisfactory performance level attained on ABSITE
- Understanding of enteral and parenteral nutrition
- Management of multiple system organ failure
- Evaluation of the acute abdomen
- Understanding of manifestations of peripheral vascular disease
- Understanding of manifestations of biliary and pancreatic disease
- Understanding of manifestations of skin and soft tissue disease

Patient Care

- All elements expected in PGY-2 goals
- Perform open or laparoscopic cholecystectomy
- Perform right colectomy, splenectomy
- Perform gastrostomy, jejunostomy, colostomy
- Perform breast biopsy/mastectomy
- Perform small bowel resection

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff, and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Baptist Memorial Hospital (IN/3)

Rotation: General Surgery

PGY Level: 4

Medical Knowledge

- All elements expected in PGY-3 goals
- Satisfactory performance level attained on ABSITE
- Understanding of manifestations of thyroid and parathyroid disease
- Understanding of manifestations of aortic and peripheral aneurysms
- Understanding of manifestations of breast and head and neck disease
- Understanding of surgical critical care
- Understanding of manifestations of liver disease and portal hypertension

Patient Care

- All elements expected in PGY-3 goals
- Vascular anastomosis
- Colon resection, pancreatic debridement
- Management of pseudocyst
- Gastric Resection, vagotomy
- Ventral hernias, small bowel obstruction

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Baptist Memorial Hospital (IN/3)

Rotation: General Surgery

PGY Level: 5

Medical Knowledge

- All elements expected in PGY-4 goals
- Must demonstrate a complete understanding of the perioperative management of all of the principal components of general surgery
- Satisfactory performance level attained on ABSITE
- Understanding of manifestations of adrenal and gynecologic disease
- Understanding of manifestations of mesenteric vascular disease
- Understanding of manifestations of renovascular hypertension
- Understanding of manifestations of endocrine neoplasia
- Understanding of manifestations of alimentary tract neoplasms

Patient Care

- All elements expected in PGY-4 goals
- Complex aortoiliac and femoral popliteal bypass
- Surgical intervention for chronic pancreatitis
- Surgical intervention for periampullary neoplasm
- Surgical intervention for low anterior and AP resection
- Surgical intervention for portal hypertension

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff, and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Regional Medical Center (IN#1)

Rotation: Burns

Medical Knowledge

- Knowledge in Burn patient
- Understand fluid resuscitation in burns (Parkland formula)
- Recognition and treatment of upper airway management
- Recognition and treatment of electrical burns
- Cause, detection, and treatment of burn sepsis
- Cause, detection, and treatment of ARDS
- Cause, detection, and treatment of pulmonary burns
- Concepts regarding nutritional assessment in burns

Patient Care

- Escharotomy for chest and extremity compromise
- Skin grafting and donor site management
- Placement of Swan Ganz and arterial catheters
- Management of hand, face and genital burns

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Regional Medical Center (IN#1)

Rotation: Endoscopy

Medical Knowledge

- Indications/contraindications for gastroduodenoscopy and colonoscopy
- Complications of gastroduodenoscopy and colonoscopy
- Preop preparation of gastroduodenoscopy and colonoscopy
- Knowledge of conscious sedation
- Appropriate follow-up

Patient Care

- Perform gastroduodenoscopy and colonoscopy
- Perform rigid sigmoidoscopy
- Insertion of percutaneous endoscopic gastrostomy
- Jejunostomy and nasojejunal tubes
- Enteral feeding

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Methodist Hospital (IN/4)

Rotation: General Surgery

PGY Level: 1

Medical Knowledge

- Understand fluid and electrolytes
- Write appropriate admission and daily orders
- Recognition of shock, cardiac and pulmonary dysfunction
- Recognition of renal and endocrine compromise
- Appropriate usage of antibiotics
- Ability to dictate discharge and operative reports

Patient Care

- Perform history and physical exam
- Start IV, place NG tube, foley, arterial lines
- Manage simple wounds on ward, recognize infection
- Institute ACLS protocols
- Perform simple biopsy, amputation, hernia repair, appendectomy

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff, and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Methodist Hospital (IN/4)

Rotation: General Surgery

PGY Level: 2

Medical Knowledge

- All elements expected in PGY-1 goals
- Satisfactory performance level attained on ABSITE
- Baseline understanding of ventilator management
- Understand physiology and pharmacology of shock
- Workup and management of basic patients in principal components

Patient Care

- All elements expected in PGY-1 goals
- Perform CVP, peritoneal lavage, advanced airway management
- Perform flexible colonoscopy & esophagoduodenoscopy
- Perform flexible bronchoscopy, Swan Ganz Catheter
- Perform opening and closing of the abdomen
- Perform abdominal exploration
- Complete Department of Surgery Skills Lab Program

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff, and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.

- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Methodist Hospital (IN/4)

Rotation: General Surgery

PGY Level: 3

Medical Knowledge

- All elements expected in PGY-2 goals
- Satisfactory performance level attained on ABSITE
- Understanding of enteral and parenteral nutrition
- Management of multiple system organ failure
- Evaluation of the acute abdomen
- Understanding of manifestations of peripheral vascular disease
- Understanding of manifestations of biliary and pancreatic disease
- Understanding of manifestations of skin and soft tissue disease

Patient Care

- All elements expected in PGY-2 goals
- Perform open or laparoscopic cholecystectomy
- Perform right colectomy, splenectomy
- Perform gastrostomy, jejunostomy, colostomy
- Perform breast biopsy/mastectomy
- Perform small bowel resection

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff, and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Methodist Hospital (IN/4)

Rotation: General Surgery

PGY Level: 4

Medical Knowledge

- All elements expected in PGY-3 goals
- Satisfactory performance level attained on ABSITE
- Understanding of manifestations of thyroid and parathyroid disease
- Understanding of manifestations of aortic and peripheral aneurysms
- Understanding of manifestations of breast and head and neck disease
- Understanding of surgical critical care
- Understanding of manifestations of liver disease and portal hypertension

Patient Care

- All elements expected in PGY-3 goals
- Vascular anastomosis
- Colon resection, pancreatic debridement
- Management of pseudocyst
- Gastric Resection, vagotomy
- Ventral hernias, small bowel obstruction

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Methodist Hospital (IN/4)

Rotation: General Surgery

PGY Level: 5

Medical Knowledge

- All elements expected in PGY-4 goals
- Must demonstrate a complete understanding of the perioperative management of all of the principal components of general surgery
- Satisfactory performance level attained on ABSITE
- Understanding of manifestations of adrenal and gynecologic disease
- Understanding of manifestations of mesenteric vascular disease
- Understanding of manifestations of renovascular hypertension
- Understanding of manifestations of endocrine neoplasia
- Understanding of manifestations of alimentary tract neoplasms

Patient Care

- All elements expected in PGY-4 goals
- Complex aortoiliac and femoral popliteal bypass
- Surgical intervention for chronic pancreatitis
- Surgical intervention for periampullary neoplasm
- Surgical intervention for low anterior and AP resection
- Surgical intervention for portal hypertension

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff, and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Methodist Hospital (IN/4)

Rotation: Surgical Oncology

PGY Level: 1

Medical Knowledge

- Understand fluid and electrolytes
- Write appropriate admission and daily orders
- Recognition of shock, cardiac and pulmonary dysfunction
- Recognition of renal and endocrine compromise
- Appropriate usage of antibiotics
- Ability to dictate discharge and operative reports

Patient Care

- Perform history and physical exam
- Start IV, place NG tube, foley, arterial lines
- Manage simple wounds on ward, recognize infection
- Institute ACLS protocols
- Perform simple biopsy, amputation, hernia repair, appendectomy

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Methodist Hospital (IN/4)

Rotation: Surgical Oncology

PGY Level: 2

Medical Knowledge

- All elements expected in PGY-1 goals
- Satisfactory performance level attained on ABSITE
- Baseline understanding of ventilator management
- Understand physiology and pharmacology of shock
- Workup and management of basic patients in principal components

Patient Care

- All elements expected in PGY-1 goals
- Perform CVP, peritoneal lavage, advanced airway management
- Perform flexible colonoscopy & esophagoduodenoscopy
- Perform flexible bronchoscopy, Swan Ganz Catheter
- Perform opening and closing of the abdomen
- Perform abdominal exploration
- Complete Department of Surgery Skills Lab Program

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff, and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.

- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Methodist Hospital (IN/4)

Rotation: Surgical Oncology

PGY Level: 4

Medical Knowledge

- Recognize/understand/workup abnormal cutaneous lesions
- Recognize/understand/workup lesions of the breast
- Recognize/understand/workup soft tissue masses/neoplasms
- Recognize/understand/workup head and neck oncologic lesions
- Recognize/understand/workup GYN oncology
- Recognize/understand/workup alimentary tract lesions
- Recognize/understand/workup hepatic and pancreatic neoplasms

Patient Care

- Perform cutaneous neoplasm excision
- Perform procedure for lesions of the breast
- Perform procedure for soft tissue masses/neoplasms
- Perform procedure for head and neck oncologic lesions
- Perform procedure for GYN oncology
- Perform procedure for alimentary tract lesions
- Perform procedure for hepatic and pancreatic neoplasms

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Methodist Hospital (IN/4)

Rotation: Thoracic Surgery

Medical Knowledge

- Understand/diagnosis/treatment of peripheral lung lesion
- Understand/diagnosis/treatment of hemoptysis
- Understand/diagnosis/treatment of pulmonary embolus
- Understand/diagnosis/treatment of pneumothorax/tension
- Understand/diagnosis/treatment of hemothorax
- Understand/diagnosis/treatment of trauma to the chest

Patient Care

- Placement and management of tube thoracostomy
- Tracheostomy
- Closure of thoracotomy
- Chest decompression for tension pneumothorax
- Perform thoracotomy
- Post-op care of CABG and thoracotomy patient

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Methodist Hospital (IN/4)

Rotation: Transplant

PGY Level: 2

Medical Knowledge

- All elements expected in PGY-1 goals
- Satisfactory performance level attained on ABSITE
- Understand Clinical and laboratory basis for the diagnosis of renal failure
- Understand Clinical and radiological basis for the diagnosis of fluid overload
- Understand Clinical and laboratory basis for the diagnosis of electrolyte abnormalities
- Understand Urgent treatment of hyperkalemia. Indication for urgent dialysis in acute and chronic renal failure
- Understand Mechanism of action, dosing and toxicity of immunosuppressants
- Understand Diagnosis and initial workup/treatment of febrile illness in transplant recipients
- Understand balance if infection/rejection in the care of transplant recipients
- Understand induction, maintenance

Patient Care

- All elements expected in PGY-1 goals
- Demonstrate knowledge H&P and orders for Pre-Transplant patients
- Understand diagnosis and management of shock and fluid therapy
- Understand anatomy and vascular access procedures
- Insertion of permanent peritoneal dialysis catheters
- Post-operative care of renal and hepatic transplant patients
- Demonstrate understanding of cadaver donor procurement
- Demonstrate ability to institute ACLS protocols

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff, and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Methodist Hospital (IN/4)

Rotation: Vascular Surgery

PGY Level: 3/4

Medical Knowledge

- Understand rationale for duplex doppler studies
- Understand segmental pressures
- Recognition/management of transient ischemic attack
- Recognition/management of ruptured AAA
- Recognition/management of aortoiliac occlusive disease
- Recognition/management of rest pain
- Recognition/management of acute thrombosis/embolus
- Recognition/management of renovascular hypertension

Patient Care

- Perform carotid endarterectomy
- Perform aortic tube graft
- Perform aortofemoral bypass graft
- Perform femoral popliteal bypass
- Perform arteriovenous shunt/fistula
- Perform caval filter

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Regional Medical Center (IN#1)

Rotation: Neurosurgery

PGY Level: 1

Medical Knowledge

- Diagnosis and management of intracranial tumor
- Workup of back pain
- Diagnosis of intracerebral, subdural and epidural hematomas
- Diagnosis and treatment of intracranial hypertension
- Use of Glasgow coma scale
- Interpret cranial CT scan
- Appropriate placement of burr holes for subdural/epidural
- Diagnosis and treatment of spinal cord injuries
- Diagnosis and treatment of carpal tunnel syndrome
- Diagnosis and treatment of peripheral nerve injury

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care. moonlighting"

GOALS AND OBJECTIVES

Hospital: LeBonheur Hospital (IN#6)

Rotation: Pediatric Surgery

PGY Level: 1

Medical Knowledge

- Understand pediatric fluid and electrolytes
- Write appropriate admission orders
- Dictation of operative and discharge reports
- Recognize pediatric patient with pyloric stenosis
- Recognize pediatric patient with diaphragmatic hernia
- Recognize pediatric patient with acute scrotum
- Recognize pediatric patient with F.B. ingestion
- Recognize pediatric patient with acute abdomen
- Recognize pediatric patient with groin mass
- Recognize pediatric patient with umbilical hernia

Patient Care

- History and physical exam
- Start/place IV, NG tube, foley, PICC line
- ACLS protocol in PEDS
- Workup/operate/follow patient with inguinal hernia on children > 1 year
- Workup/operate/follow patient with appendicitis
- Workup/operate/follow patient with congenital stenosis of pylorus
- Workup/operate/follow patient with hydrocele
- Workup/operate/follow patient with circumcision
- Workup/operate/follow patient with node excision
- Workup/operate/follow patient with biopsy

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: LeBonheur Hospital (IN#6)

Rotation: Pediatric Surgery

PGY Level: 2/3

Medical Knowledge

- Completed goals of PGY-1 in Peds
- Understanding/recognition of tracheoesophageal fistulas/stenosis
- Understanding/recognition of anorectal abnormalities
- Understanding/recognition of diaphragmatic hernias
- Understanding/recognition of intussusception
- Understanding/recognition of omphalocele/gastroschisis
- Understanding/recognition of congenital heart disease
- Understanding/recognition of undescended testicle
- Understanding/recognition of GER in children

Patient Care

- Completed goals of PGY-1 in Peds
- Perform bowel resection
- Perform Nissen
- Perform laparoscopy
- Perform exploratory laparotomy
- Perform fundoplication/G-tube
- Perform splenectomy
- Perform cholecystectomy

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.

- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: St. Francis Hospital (IN/5)

Rotation: General Surgery

PGY Level: 4

Medical Knowledge

- All elements expected in PGY-3 goals
- Satisfactory performance level attained on ABSITE
- Understanding of manifestations of thyroid and parathyroid disease
- Understanding of manifestations of aortic and peripheral aneurysms
- Understanding of manifestations of breast and head and neck disease
- Understanding of surgical critical care
- Understanding of manifestations of liver disease and portal hypertension

Patient Care

- All elements expected in PGY-3 goals
- Vascular anastomosis
- Colon resection, pancreatic debridement
- Management of pseudocyst
- Gastric Resection, vagotomy
- Ventral hernias, small bowel obstruction

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: St. Francis Hospital (IN/5)

Rotation: General Surgery

PGY Level: 5

Medical Knowledge

- All elements expected in PGY-4 goals
- Must demonstrate a complete understanding of the perioperative management of all of the principal components of general surgery
- Satisfactory performance level attained on ABSITE
- Understanding of manifestations of adrenal and gynecologic disease
- Understanding of manifestations of mesenteric vascular disease
- Understanding of manifestations of renovascular hypertension
- Understanding of manifestations of endocrine neoplasia
- Understanding of manifestations of alimentary tract neoplasms

Patient Care

- All elements expected in PGY-4 goals
- Complex aortoiliac and femoral popliteal bypass
- Surgical intervention for chronic pancreatitis
- Surgical intervention for periampullary neoplasm
- Surgical intervention for low anterior and AP resection
- Surgical intervention for portal hypertension

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff, and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Regional Medical Center (IN#1)

Rotation: Trauma

PGY Level: 1

Medical Knowledge

- Understand fluid and electrolytes
- Understand postoperative wound management
- Recognize and treat postoperative wound infections
- Write appropriate admission and daily orders
- Recognition of shock, cardiac and pulmonary dysfunction
- Recognition of renal and endocrine compromise
- Appropriate usage of antibiotics
- Ability to dictate discharge and operative reports
- Identification of early systemic sepsis

Patient Care

- Perform history and physical exam
- Start IV, place NG tube, foley, arterial lines
- Manage simple wounds on ward, recognize infection
- Institute ACLS protocols
- ACLS and ATLS protocols
- Chest tube placement and management
- Venous and arterial line placement

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Regional Medical Center (IN#1)

Rotation: Trauma

PGY Level: 2

Medical Knowledge

- Understand the initial evaluation of the trauma patient
- Concepts of triage in mass casualties
- Indications for peritoneal lavage
- Extremity vascular compromise
- Recognition of airway compromise and treatment

Skills

- Perform tracheostomy and cricothyroidotomy
- Perform peritoneal lavage
- CVP and Swan Ganz placement
- Recognize and treat hemothorax
- Recognize and treat tension pneumothorax
- Recognize and treat cardiac tamponade
- Recognize and treat pulsatile bleeding
- Interpret hemodynamic measurements
- Understand indication for mechanical ventilation
- Recognize and treat oliguria

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Regional Medical Center (IN#1)

Rotation: Trauma

PGY Level: 3

Medical Knowledge

- Recognize/treat enlarged mediastinum
- Recognize/treat extremity vascular injury
- Recognize/treat closed head injury
- Recognize/treat pelvic fracture
- Recognize/treat penetrating abdominal trauma
- Recognize/treat blunt abdominal trauma

Patient Care

- Perform/direct advance trauma resuscitation
- Perform exploratory laparotomy
- Perform small bowel repair/resection
- Perform gastric repair
- Repair colon resection/repair
- Identify and treat rectal injury

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Regional Medical Center (IN#1)

Rotation: Trauma

PGY Level: 4

Medical Knowledge

- Admission/stabilization of the ICU patient
- Knowledge of hemodynamic manipulation with pressors
- Ventilator management in the trauma patient
- Nutritional assessment of the trauma patient
- Appropriate usage of antibiotics/antifungals
- Knowledge of clotting and transfusion
- Workup and management of renal injuries

Patient Care

- Perform splenectomy/splenorrhaphy
- Repair minor liver injuries
- Repair diaphragm injuries
- Workup and management of penetrating neck injuries
- Recognition of retroperitoneal injuries
- Perform major soft tissue debridement

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Regional Medical Center (IN#1)

Rotation: Trauma

PGY Level: 5

Medical Knowledge

- Diagnose and treat ARDS
- Diagnose and treat multiple organ failure
- Diagnose and treat hypovolemic, septic and cardiac shock
- Diagnose and treat post-traumatic renal failure
- Diagnose and treat massive coagulation defects
- Diagnose and treat reperfusion injury

Patient Care

- Operative management of retroperitoneal injuries
- Operative management of pancreatic injuries
- Operative management of major abdominal vascular injuries
- Operative management of major liver injuries
- Operative management of severe hemothorax
- Operative management of renal injuries
- Operative management of peripheral vascular injuries
- Operative management of mesenteric vascular injuries

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Veteran's Administration Hospital (IN/2)

Rotation: Nutrition Support Service

PGY Level: 1/2

Knowledge

- Understand normal fluid and electrolyte management and evaluate and treat fluid and electrolyte disturbances
- Central venous access and complications
- Nasoenteric tube placement and its complications
- Calculation of nutritional needs and calorie/nitrogen ratio & total caloric needs
- Manipulate carbohydrate/fat/protein dependent upon individual disease states
- Recognize and treat metabolic disorders including hyperglycemia, refeeding syndrome, diabetes insipidus, and trace metal deficiencies

Skills

- Nutritional assessment including metabolic disorders
- Placement of enteral feeding tubes
- Placement of central venous access for parenteral nutrition
- Line changes over guide wires
- Management of early enteral feeding in critically ill patients

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Veterans Hospital (IN/2)

Rotation: General Surgery

PGY Level: 1

Medical Knowledge

- Understand fluid and electrolytes
- Write appropriate admission and daily orders
- Recognition of shock, cardiac and pulmonary dysfunction
- Recognition of renal and endocrine compromise
- Appropriate usage of antibiotics
- Ability to dictate discharge and operative reports

Patient Care

- Perform history and physical exam
- Start IV, place NG tube, foley, arterial lines
- Manage simple wounds on ward, recognize infection
- Institute ACLS protocols
- Perform simple biopsy, amputation, hernia repair, appendectomy

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Veterans Hospital (IN/2)

Rotation: General Surgery

PGY Level: 2

Medical Knowledge

- All elements expected in PGY-1 goals
- Satisfactory performance level attained on ABSITE
- Baseline understanding of ventilator management
- Understand physiology and pharmacology of shock
- Workup and management of basic patients in principal components

Patient Care

- All elements expected in PGY-1 goals
- Perform CVP, peritoneal lavage, advanced airway management
- Perform flexible colonoscopy & esophagoduodenoscopy
- Perform flexible bronchoscopy, Swan Ganz Catheter
- Perform opening and closing of the abdomen
- Perform abdominal exploration
- Complete Department of Surgery Skills Lab Program

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff, and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.

- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Veterans Hospital (IN/2)

Rotation: General Surgery

PGY Level: 3

Medical Knowledge

- All elements expected in PGY-2 goals
- Satisfactory performance level attained on ABSITE
- Understanding of enteral and parenteral nutrition
- Management of multiple system organ failure
- Evaluation of the acute abdomen
- Understanding of manifestations of peripheral vascular disease
- Understanding of manifestations of biliary and pancreatic disease
- Understanding of manifestations of skin and soft tissue disease

Patient Care

- All elements expected in PGY-2 goals
- Perform open or laparoscopic cholecystectomy
- Perform right colectomy, splenectomy
- Perform gastrostomy, jejunostomy, colostomy
- Perform breast biopsy/mastectomy
- Perform small bowel resection

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff, and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Veterans Hospital (IN/2)

Rotation: General Surgery

PGY Level: 4

Medical Knowledge

- All elements expected in PGY-3 goals
- Satisfactory performance level attained on ABSITE
- Understanding of manifestations of thyroid and parathyroid disease
- Understanding of manifestations of aortic and peripheral aneurysms
- Understanding of manifestations of breast and head and neck disease
- Understanding of surgical critical care
- Understanding of manifestations of liver disease and portal hypertension

Patient Care

- All elements expected in PGY-3 goals
- Vascular anastomosis
- Colon resection, pancreatic debridement
- Management of pseudocyst
- Gastric Resection, vagotomy
- Ventral hernias, small bowel obstruction

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Veterans Hospital (IN/2)

Rotation: General Surgery

PGY Level: 5

Medical Knowledge

- All elements expected in PGY-4 goals
- Must demonstrate a complete understanding of the perioperative management of all of the principal components of general surgery
- Satisfactory performance level attained on ABSITE
- Understanding of manifestations of adrenal and gynecologic disease
- Understanding of manifestations of mesenteric vascular disease
- Understanding of manifestations of renovascular hypertension
- Understanding of manifestations of endocrine neoplasia
- Understanding of manifestations of alimentary tract neoplasms

Patient Care

- All elements expected in PGY-4 goals
- Complex aortoiliac and femoral popliteal bypass
- Surgical intervention for chronic pancreatitis
- Surgical intervention for periampullary neoplasm
- Surgical intervention for low anterior and AP resection
- Surgical intervention for portal hypertension

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff, and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Veteran's Hospital (IN/2)

Rotation: Thoracic Surgery

Medical Knowledge

- Understand/diagnosis/treatment of peripheral lung lesion
- Understand/diagnosis/treatment of hemoptysis
- Understand/diagnosis/treatment of pulmonary embolus
- Understand/diagnosis/treatment of pneumothorax/tension
- Understand/diagnosis/treatment of hemothorax
- Understand/diagnosis/treatment of trauma to the chest

Patient Care

- Placement and management of tube thoracostomy
- Tracheostomy
- Closure of thoracotomy
- Chest decompression for tension pneumothorax
- Perform thoracotomy
- Post-op care of CABG and thoracotomy patient

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Regional Medical Center (IN/1)

Rotation: General Surgery

PGY Level: 1

Medical Knowledge

- Understand fluid and electrolytes
- Write appropriate admission and daily orders
- Recognition of shock, cardiac and pulmonary dysfunction
- Recognition of renal and endocrine compromise
- Appropriate usage of antibiotics
- Ability to dictate discharge and operative reports

Patient Care

- Perform history and physical exam
- Start IV, place NG tube, foley, arterial lines
- Manage simple wounds on ward, recognize infection
- Institute ACLS protocols
- Perform simple biopsy, amputation, hernia repair, appendectomy

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff, and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.
- The resident should be sensitive to the needs and feelings of others, including the patient's family members, allied health care personnel, fellow residents, and medical students.
- Demonstrate respect, compassion, integrity in the care of patients on a daily basis and sensitivity to patients' culture, age, and gender.

Interpersonal Relationships and Communication

- Create and sustain a therapeutic and ethically sound relationship with patients.
- Work effectively with other members of the medical team including fellow residents and medical students.
- Maintain professional interactions with other health care providers and hospital staff.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Regional Medical Center (IN/1)

Rotation: General Surgery

PGY Level: 2

Medical Knowledge

- All elements expected in PGY-1 goals
- Satisfactory performance level attained on ABSITE
- Baseline understanding of ventilator management
- Understand physiology and pharmacology of shock
- Workup and management of basic patients in principal components

Patient Care

- All elements expected in PGY-1 goals
- Perform CVP, peritoneal lavage, advanced airway management
- Perform flexible colonoscopy & esophagoduodenoscopy
- Perform flexible bronchoscopy, Swan Ganz Catheter
- Perform opening and closing of the abdomen
- Perform abdominal exploration
- Complete Department of Surgery Skills Lab Program

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff, and medical students.

Professionalism

- Participate in compassionate patient care maintaining the highest moral and ethical values with a professional attitude.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.

- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Regional Medical Center (IN/1)

Rotation: General Surgery

PGY Level: 3

Medical Knowledge

- All elements expected in PGY-2 goals
- Satisfactory performance level attained on ABSITE
- Understanding of enteral and parenteral nutrition
- Management of multiple system organ failure
- Evaluation of the acute abdomen
- Understanding of manifestations of peripheral vascular disease
- Understanding of manifestations of biliary and pancreatic disease
- Understanding of manifestations of skin and soft tissue disease

Patient Care

- All elements expected in PGY-2 goals
- Perform open or laparoscopic cholecystectomy
- Perform right colectomy, splenectomy
- Perform gastrostomy, jejunostomy, colostomy
- Perform breast biopsy/mastectomy
- Perform small bowel resection

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff, and medical students.

Systems Based Practice

- Understand how the health care organization affects surgical practice.
- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Regional Medical Center (IN/1)

Rotation: General Surgery

PGY Level: 4

Medical Knowledge

- All elements expected in PGY-3 goals
- Satisfactory performance level attained on ABSITE
- Understanding of manifestations of thyroid and parathyroid disease
- Understanding of manifestations of aortic and peripheral aneurysms
- Understanding of manifestations of breast and head and neck disease
- Understanding of surgical critical care
- Understanding of manifestations of liver disease and portal hypertension

Patient Care

- All elements expected in PGY-3 goals
- Vascular anastomosis
- Colon resection, pancreatic debridement
- Management of pseudocyst
- Gastric Resection, vagotomy
- Ventral hernias, small bowel obstruction

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff and medical students.

- Demonstrates cost effective health care.
- Knows how to partner with health care managers and allied health personnel to improve health care.

GOALS AND OBJECTIVES

Hospital: Regional Medical Center (IN/1)

Rotation: General Surgery

PGY Level: 5

Medical Knowledge

- All elements expected in PGY-4 goals
- Must demonstrate a complete understanding of the perioperative management of all of the principal components of general surgery
- Satisfactory performance level attained on ABSITE
- Understanding of manifestations of adrenal and gynecologic disease
- Understanding of manifestations of mesenteric vascular disease
- Understanding of manifestations of renovascular hypertension
- Understanding of manifestations of endocrine neoplasia
- Understanding of manifestations of alimentary tract neoplasms

Patient Care

- All elements expected in PGY-4 goals
- Complex aortoiliac and femoral popliteal bypass
- Surgical intervention for chronic pancreatitis
- Surgical intervention for periampullary neoplasm
- Surgical intervention for low anterior and AP resection
- Surgical intervention for portal hypertension

Practice Based Learning

- Develop a personal program of self-study and professional growth with guidance from the teaching staff and faculty advisor.
- Participate in teaching and organization of the educational conferences and activities of the Department of Surgery and assume responsibility for teaching and supervision of subordinate surgical housestaff, and medical students.
