

MDI Certification Courses

MDI Certification Courses are designed for dentists who want to improve profitability and patient satisfaction in their practices using the market leading MDI system to stabilize dentures. The courses emphasize MDI treatment planning, patient selection, implant placement, restorative techniques and MDI patient marketing strategies.

- Understand maxillofacial anatomy as it pertains to minimally invasive implantology
- Recognize the indications and contraindications for the use of IMTEC MDI implants
- Learn minimally invasive placement protocols and simple restorative techniques to stabilized lower dentures with IMTEC MDI system
- Understand what is unique and different about MDI placement/restoration in the maxilla
- Practice the MDI placement protocol on a realistic anatomical mandible model (the model is yours to keep)
- Learn successful case selection and case planning strategies
- Learn proper approaches to post-operative care
- Take home valuable tools and guidance to market the MDI system in your community and create new profitable revenue for your practice
