Date: ___/___/___

Re: _____, DOB: ___/___/___

To Whom It May Concern:

The above child was seen in our office today for evaluation of school/behavioral problems. Following this assessment, I am concerned that this child may have cognitive deficits or learning difficulties that are significantly affecting school performance.

Therefore, I am recommending that this child have formal testing to identify potential cognitive or educational deficiencies. If necessary, an M-Team meeting may be necessary.

Sincerely,

Physician
