## **Frequently Asked Questions**

### **Can I get CE information off the Web?**

The information in this booklet and periodic updates may be accessed through the College's web site:

<http://cop.utmem.edu>, click on "Continuing Education"

### **What kinds of CE will be offered this year?**

During 2009, we will be offering a variety of ways for pharmacists and pharmacy technicians to earn continuing education credits to maintain existing competency and to develop new competencies. The methods for earning CE credits include live seminars, live teleconferences, web-based courses, and independent-study or home-study courses listed in this booklet.

### **Are all these programs approved in Tennessee?**

All of the following continuing education activities are approved for CE credit in Tennessee and the majority of those states requiring proof of continuing education for relicensure as a pharmacist or re-certification as a pharmacy technician.

### **How do I get my statement of CE hours?**

An original statement of continuing education hours will be either provided at the conclusion of the activity or mailed following completion of the activity. If you need this information for additional states, most state boards will accept photocopies. If not, please advise and we will provide additional original statements.

### **How many hours do I need?**

The CE requirement for pharmacists licensed in Tennessee is 30 hours every two years, renewed on a staggered monthly basis. PTCB certified technicians must complete 20 hours of CE every two years, including one hour of law (ACPE number ending in "03").

### **Are there any requirements as to the type of credits?**

The Tennessee Board of Pharmacy requires 30 hours of CE credit during the preceding two-year period of your license renewal. One-half (15) of these hours must be live programs.

### **How do I know if a program is "live"?**

Live programs are designated as "L" (as opposed to home study or correspondence courses designated as "H") in the last three digits of the ACPE program number.

### **What do the other numbers in the ACPE number mean?**

Some states—not Tennessee—require that a portion of the CE requirement be from select topics designated by the last digit of the ACPE number: 01-Therapeutics, 02-AIDS, 03-Law, 04-General or 05-Drug Safety. PTCB certified technicians in Tennessee must complete one hour of law every two years—program number ending in 03. The designation "P" is for pharmacists only, "T" for technicians only, or "P & T" if the program is accredited for both pharmacists and technicians.

### **Where can I obtain my credits?**

In Tennessee, eighty percent (80%) or twenty-four (24) of the thirty (30) hours must be obtained from a provider approved by the Accreditation Council for Pharmacy Education (ACPE). The remaining six hours (20%) may be obtained from an ACPE provider, or programs pre-approved by the Tennessee Board of Pharmacy, but these non-ACPE hours will not count toward the live requirement. That is, you must have at least 15 live hours with an ACPE number every two years.

### **How do I know if the provider is accredited by ACPE?**

To determine if a provider of continuing education is accredited by the ACPE, look for this ACPE logo and a program number on informational brochures.

### **What if I'm licensed in states other than Tennessee?**

UT College of Pharmacy sponsored activities will be acceptable in all states that recognize ACPE accredited providers. Credits obtained at one activity will meet the requirement in multiple states.

### **How do I enroll or register?**

For most programs, you may enroll by telephone, fax, regular mail, e-mail, or on-line. For most of the live seminars, registration information will be mailed 4 to 6 weeks prior to each activity and will be posted on the College's web site: <http://cop.utmem.edu>.

### **What about pharmacy technicians? Are they invited to participate in these CE activities?**

Pharmacy technicians who are certified through the PTCB are required to obtain CE. Many programs will be offered for both pharmacists and technicians. These will be designated as "P" for pharmacists, "T" for technicians, or "P & T" if the program is accredited for both pharmacists and technicians.
